INCREASED CAPACITY / FREQUENCY FOR 2012

Pacific Direct Line recognises the need for more capacity and a greater frequency in these markets and please to advise you that we have identified a vessel in the charter market that will join our fleet in the first quarter of 2012.

This will give you a 2 vessel service into these markets and allow Pacific Direct Line to increase frequency and capacity and meet the needs of both the shippers and consignees.

We take this opportunity to thank you all for your continued support and understanding over the past few months. Please be ensured that we are taking these steps to alleviate the current issues and provide the people of the Pacific region a dedicated and reliable service.

Please do not hesitate to contact our office or your local Transam / Pacific Direct Line agent should you require any further information.

Thank you all once again
Kind regards

The team at Pacific Direct Line
